

Mr. Powell,

Very impressive, the High Tech Broadband Coalition supporting a the CLEC's now?!?! Yea, I'm sure that is what they said from the very beginning! I just can't find it on the record. Ok, let's just ignore that past year and all their filings. They sure did turned a new leaf right at the last second.

I hope the CLEC's remember who was behind them from the beginning. I hope the CLEC's remember who was behind the High Tech Broadband Coalition as they invest in UNE-L facilities in the future. CLEC's don't ever forget the past. It will bite you in the Azz, during the next Triennial Review.
